Summary

Passionate mobile developer specializing in Flutter, with a strong focus on building userfriendly and efficient cross-platform applications. Currently pursuing a degree in Computer Science at the Faculty of Computer Science and Artificial Intelligence, Banha University. Actively engaged as a trainee at DEBI, contributing to real-world projects and continuously enhancing technical proficiency and hands-on development experience.

Education

Banha University | 2023-present

Student at CS Department Current GPA: 3.56

Experience

Trainee, DEBI Program Jun 2025

Participated in intensive training focused on mobile app development using Flutter.
Learned Dart programming basics, explored core Flutter widgets, and practiced building functional mobile applications.
Collaborated with peers on real-world projects, applying programming concepts and agile methodologies.
Solved 391 problems on Codeforces.
Developed practical skills in software development, problem-solving, and teamwork within a professional training environment.

Courses

- OOP in Arabic (Omar Ahmed)
- Learn Dart from Scratch (Wael Abo Hamza)
- Complete Flutter & Dart Development Course [Arabic]

Skills

- **Programming Languages:** C++, Java, Python, Dart
- **Frameworks & Tools:** Flutter (Basics), Firebase, API, UI, UX
- **Computer Science:** OOP, Data Structures, Problem Solving, Research

- **Soft Skills:** Teamwork, Multitasking ability, Strong interpersonal skills

---

Projects

Lab link – GitHub

Lab Link is a digital system that connects patients with laboratories. It allows patients to search for labs, book and pay for appointments, receive test results, and provide feedback. The system supports three types of users: Patients, Lab Admins, and Super Admins.

News App – GitHub

News App is a Flutter-based mobile application that presents the latest articles in a clean, scrollable list view. Users can browse and read news articles simply by tapping on items in the list, without any additional buttons. The app efficiently uses Flutter widgets for smooth

navigation and real-time data display, optimized for both Android and iOS. Users can browse and read articles easily. Tools: API, Dio package

Chat App – GitHub

A cross-platform mobile chat application built with Flutter and integrated with Firebase for backend services. The app provides real-time messaging, user authentication, and push notifications, ensuring a smooth and secure chatting experience.

- Features:
  1. User Authentication with Firebase (email & password).
  2. Real-time Chat powered by Cloud Firestore.
  3. Push Notifications for new messages (via Firebase Cloud Messaging).
  4. Clean UI/UX built with Flutter widgets.
  5. Scalable to support one-to-one or group conversations.
- Tools & Technologies
  - Flutter & Dart
  - Firebase
  - GitHub

Tunes Player App

Tunes Player is a Flutter app that displays a list of audio tracks. Users can tap any item in the list to play the corresponding sound. The app features a simple, clean interface focused on

easy browsing and playback.

Expense Tracker – GitHub

A mobile application built with Flutter that helps users efficiently manage their personal finances. The app allows tracking of daily income and expenses, categorizing transactions, and visualizing spending habits through interactive charts.

Tools: Flutter & Dart, Firebase, State Management (Provider), GitHub, VS Code

Basketball Points Counter App

Flutter app to track scores for two basketball teams in real time with simple UI and state management.
